These guys can move fast we they're motivated. Cert request is not yet in the queue, but soon I'm sure. Based on what I see (Travis has e-mailed SCR and general owner's manual info today), looks like the cert can be issued when we see it. I can make a stab at updating Jason's document to reflect the chassis cert.

Subject: SCR Warning/Inducements - Ford

Travis - Marty R. called this morning. He has an assignment tied documenting Ford's warning/inducements that requires access to Ford's diesel owners manual. Please send him the diesel supplement (and base owners manual, if appropriate).

Marty - I confirmed w/ Todd Crompton that the materials we provided on SCR-related warnings/inducements are common between the engine dyno-certified product and the chassis-certified product.
